

1. Check-In & Project Inspection:

We kindly request all teams to arrive promptly at 8:00 a.m. for inspections before the welcome ceremony begins. Teams failing to undergo inspection will be disqualified from the competition.

Our inspection team will assess the project's cost, considering every item used, regardless of its source (e.g., provided by the university, purchased, or not built by the team). Projects exceeding budgetary limits will face disqualification.

In addition, safety measures will be a priority for the inspection team, ensuring the well-being of all participants during robot operations and disaster simulations.

2. Round I: Pitches:

Qualifying teams will present their ideas. Round I contributes 30% to the overall score, divided equally between Project Presentation and Business Viability, each worth 15%. A detailed rubric will be provided later.

Each team will have 5 minutes for their presentation, so please adhere to this time limit. Exceeding the time limit may result in interruption. Following the presentation, judges will conduct a question-and-answer session.

Presentation materials must be submitted to the committee by **April 25th**. Our team will display the materials during your presentation slot. Failure to meet the deadline will result in exclusion from the pitch round. Details on the submission process will be provided at a later date.

Please note: **Only team members** may participate in the presentation and Q&A session; Team Advisors are not permitted to join.

3. Round II: Demonstration:

Each team will set up their simulation or disaster scenario. Judges will observe live demonstrations of the robots and may ask questions to team members. Round II contributes 70% to the total score, with a detailed rubric provided later.

Each team has 10 minutes for their demonstration, so please adhere to this time limit.

4. Poster Session:

Each team will have a booth and board to showcase their projects and posters (if available).

Teams are responsible for printing their own posters. For any further information regarding board size, please contact the committee.

Final Remarks:

These guidelines are crucial for ensuring a seamless event and an enjoyable experience for all participants. We are dedicated to delivering an exceptional event and appreciate your cooperation in achieving this goal.
